Fellow Red Angus Breeders and Friends:

I want to start by thanking all our past and future customers. Our goal is to help you get your herd where you want it to go! In a time of variable cattle prices, it's good to know that Red Angus genetics are topping the markets. It's because Red Angus are in demand all over the country. The females are outselling their steer mates, what other breed can say that? When it comes to cross breeding, Red Angus genetics compliment all other breeds.

We are again offering a volume discount on bull purchases. If you purchase 5 bulls, you will receive a 5% discount on your total bull purchase and if you buy 6 bulls or more you will receive a 10% discount on your total bull purchase. As always, we offer free delivery on bull purchases within 500 miles of the ranch.

We are excited to bring you a group of bulls we are very pleased about. The quality runs deep in this set and the overall consistency of the bulls is better than ever. The bulls included in the sale are the top 40% of our bull calf crop from 2019, as we have already shipped 3 loads of steers last fall that averaged over 700 pounds! The quality in these bulls is top notch and the competition is tough to make it into the sale. Each bull in the sale has been hand selected based on the following traits: soundness, structure, docility, performance as well as calving ease, growth and maternal. All bulls are sold guaranteed and have passed a breeding soundness exam.

We feed and grow the bulls in our own bull development feedlot on hay, silage, oats, corn, and a protein supplement ration. The protein supplement is a blend of natural by-pass proteins that provide essential amino acids for improved feed conversion. This means we get the desired gains using less grain. It also helps produce more muscle and less fat. This ration is designed for a 3lb/day gain.

There will also be a fancy, fancy set of home-raised commercial yearling replacement heifers that will follow the bulls in the sale. These heifers are raised right alongside of the heifers that we keep as our own replacements. This will include a pen of stout made Simmental cross heifers with tons of brood cow potential. When selecting for replacement females we are selecting for the same traits as the bulls but focusing on feet and udder qualities. The replacement heifers are fed a maintenance ration in the feedlot to condition them for breeding. The average weight on the heifers is about 850 lbs.

Feel free to stop any time before the sale to look at the cattle. Calving has started, but someone will be around whenever it is convenient for you. Please join us on Friday, March 6th, at the Ranch feedlot. Lunch will be served starting about 11:30 and the sale starts at 1 PM (MST). We hope to see you there!

Bob, Laurie and the Sutherland Farms Crew!

# RED ANGUS FEEDER CALF CERTIFICATION PROGRAM TAG VOUCHER

*Genetic, Age and Source verify your feeder calves free or at minimal cost to increase potential for premiums in the Red Angus Feeder Calf Certification Program (FCCP).*

**Sutherland Red Angus Farms will help you with this easy process.**

1. Call the Red Angus Association of America at 940-387-3502 to answer a few questions to enroll.
2. Calves sired by Sutherland Farms bulls are eligible for the FCCP program. The RAAA will invoice the cost of the tags to us at the rate of one bag of 25 tags per bull purchased in this year's sale. If you need additional tags, they can be purchased by the bag for \$0.99/tag, but can only be used in calves that qualify for certification.

3. The FCCP tags are serial numbered at the bottom leaving space on both the front and back for your own numbering system of ID. This is the lowest-cost system in the industry to USDA genetic, age and source verify your cattle.

## Red Angus Feeder Calf Certification Program

For nearly two decades the FCCP has been delivering results for bull customers using ONLY Red Angus.

**Genetic, Source  
& Age**

Released in 2012, Allied Access provides an added-value option for Red Angus customers using multiple breeds in a rotation, hybrids and/or composite bulls to capture heterosis in their crossbreeding programs.

- b = recessive red gene
- bb = homozygous red
- BB = homozygous black

# SUTHERLIN FARMS RED ANGUS

# Commercial Heifers

Lots 101-235 are the commercial heifers. The commercial heifers offered here are all home-grown, and have NO brands. The heifers have had their pre-breeding vaccinations and have been deliced. The heifers should weigh 800-850 lbs. on sale day. They will be grouped in pens of 25 and sold in lots of 5. In this manner we will bring into the ring the first 5 heifers in that pen. They will represent the entire pen. The successful bidder will then have the right to take as many of the heifers in this pen, in 5 head increments, as he wished, at the same price as the first 5 lots. Thus, he could buy 5, 10, 15, 20, or 25 heifers at one bid.

# RED ANGUS GUIDE TO EPDS

- HB** – HerdBuilder is a maternally focused selection index that predicts the probability of developing profitable cowherd traits while maximizing the value of marketed progeny. Expressed as dollars per cow exposure, HB is calculated based on the scenario that bulls are mated to heifers and cows, replacement heifers are retained, and all remaining progeny are marketed on a quality-based carcass grid. (Index/High Value)
- GM** – GridMaster is a terminally focused selection index that predicts the probability to increase the value of marketed calves.
